## GQZ bearings wholesale high quality QJ200 Series Four Point Angular Contact Ball Bearing

**The characteristics of QJ200 angular contact ball bearings mainly include:**

- 1 **Strong load carrying capacity:** able to withstand both radial and axial loads and have a large load carrying capacity. This makes angular contact ball bearings widely used in the field of industrial machinery.
- 2 **Good rigidity:** the structural design makes it has high rigidity, can keep stable running state, suitable for the occasions of high precision requirements.
- 3 **High speed:** the contact angle between the inner ring and outer ring is designed as 15° or 25°, which makes the friction small and the temperature rise low, so as to increase the speed of the bearing.
- 4 **High precision:** due to the structural design of angular contact ball bearings, their precision and repeat positioning accuracy are high, which is suitable for mechanical equipment requiring high precision.
- 5 **Easy installation and adjustment:** the inner and outer rings can be separated, so it is easy to install and adjust.

## QJ200-Series-Angular-Contact-Ball-Bearing-QJ213

In addition, QJ200 angular contact ball bearings are characterized by compact structure, small space occupation and light weight, which can adapt to the needs of high-speed rotation, while the coefficient of friction is small, which can reduce the energy loss and improve the service life of the bearings.
